Diff. types of suites for diff users.
Scientist

V+V

Scale - mesh gen. 3D, large sim
in situ meshing.

Zone count of 100 million - coarse, 10s of billions of ^{high res} zones
meshes in memory.

increase
efficiency

From in original geometry data - can be recomputed
and versions.

In situ visualization not in input deck.

Input deck changes for NGL -

paradigm shift - external meshes + viz changes not
possible

1/0 bottle necks.

may use deck diff way - don't need to build file.

Embed vs extension
