

Aimee + David.

10/13

Ingen -- not for code dev.

Ease complex workflow  
Layer scripts

Simple test prob hard to do.

dump files

compile input params.

define physics at top

---

Specify app input underneath

acceptable composition

work at legacy? touchpt to trusted tool

constraints or rules : written in F90

plug + play w/ insim analysis -- future physics

recompilation in AMR?

steer analysis -- tracer particles - add another.  
add tracking of things. 3D.

Wayne  
Wesloh.  
10:30  
safety  
code  
Pegosa

job scheduling - resilience

what questions need to be answered  
with what tools?

Look at existing work flows - understand.  
handle diff users -

Transformational - components of anal + cis.  
- no physics

Daniel Israel  
Scott Doebling

layered abstractions

Code teens  
directly talk to code layers.

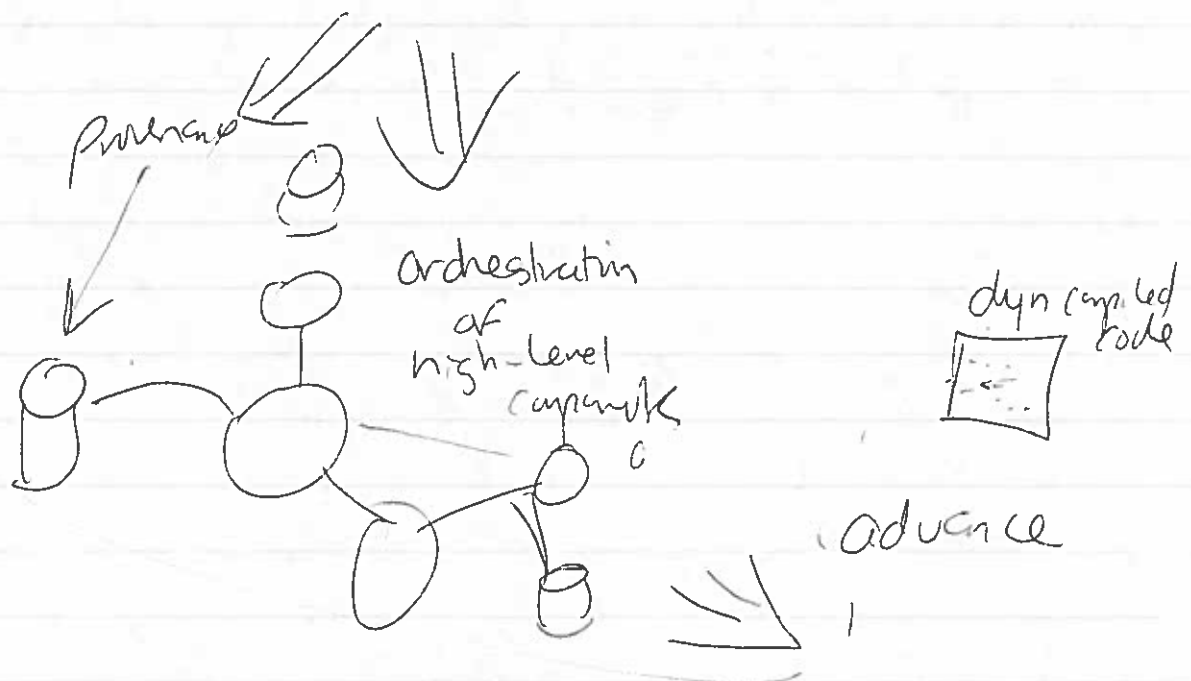

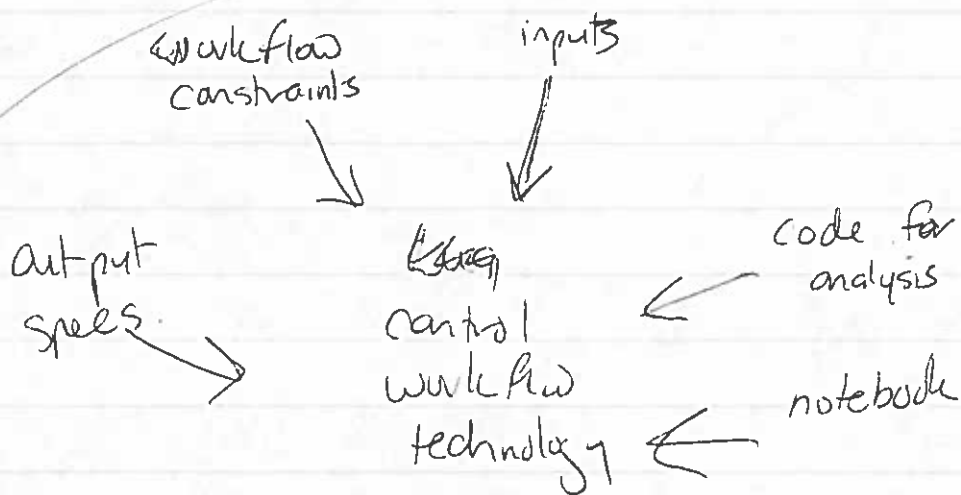

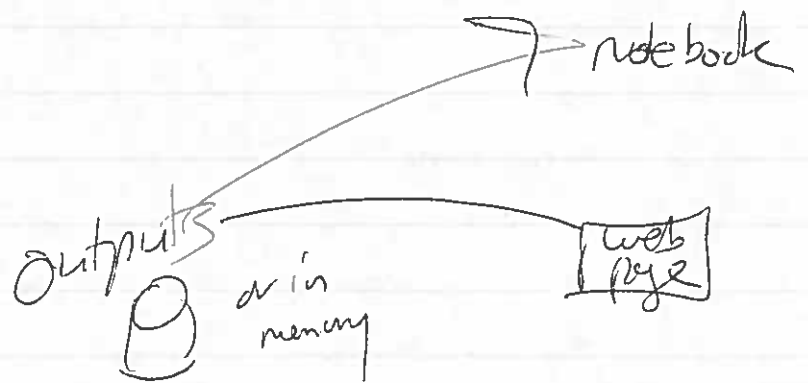

Brian - those not covering the deck

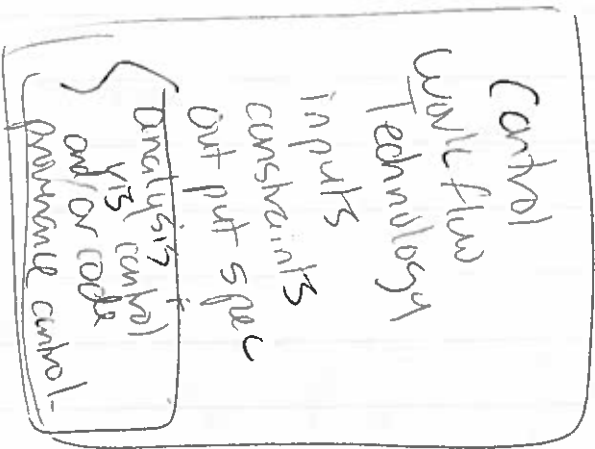

Want to go thru ~~rest~~ deck to read nextent file  
read in state + advance + write

Embedded  
Livermore code does that for steering

Rewrite parser as embedded program.  
not extensible  
"when-then"

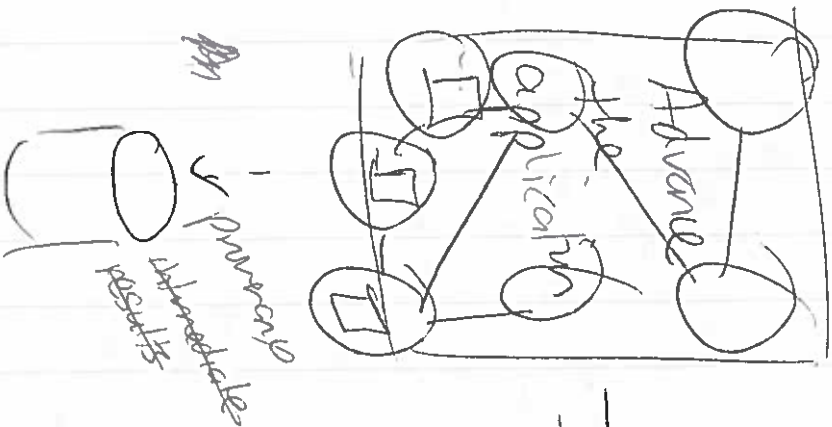

wayne weseloh

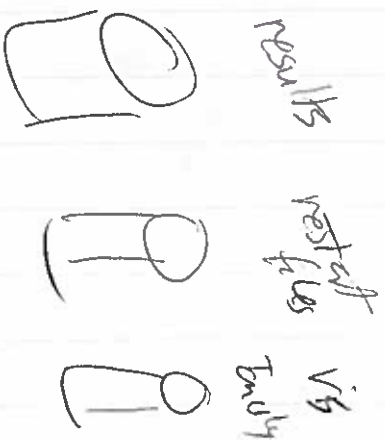

notebook

Advance the coordination app

Output

notebook?
